

NeuroTECH

About Us:

NeuroTECH provides neurodiagnostic services, ranging from per diem hospital staffing to continuous in-home monitoring for private practice physicians. Since 2010 NeuroTECH has been led by a group of physicians and experienced technologists; however, as of today, we have expanded our services and are working with hospitals, physicians, physician groups and now expanding into pharmaceutical research. Furthermore, all NeuroTECH technologists are credentialed by ABRET to provide the highest standard of care. We have met the demand for in-home diagnostic procedures as telemedicine has grown exponentially with the covid pandemic, changing the healthcare landscape as we knew it.

NeuroTECH operates with two core principles in mind. Which is to provide premier service without sacrificing safety and privacy to our patients, physicians and facilities. We also are always striving to be an exemplary extension of your organizations reputation and values.

"...their reports are timely and exceptional, and in 10 years I haven't had any complaints about the professionalism of NeuroTECH technologists..."

-Client of 10 years
